Mar, 2022

COVENANT UNIVERSITY BSc, Mass Communication

Jun, 2012

PROJECTS

FINDMYSCHOOL API (Node, Express, Mongoose, MongoDB)

Apr 2022 - May 2022

https://github.com/Cocoflosbach/findMySchool_api

Built a REST API for an application called "findMySchool" to interact with a database that stores data about different creches and kindergartens in Lagos, Nigeria. The API connects with the database using mongoose.

MYFUNFLIX APP (Node, React, HTML/CSS, Express, TailwindCSS, MongoDB)

Aug 2021 - Dec 2021

<https://myfunflix.netlify.app>

Built a movie directory REST API and frontend application that allows its registered users to log in, view a list of movies, get more information about a specific movie, add a movie to the user's favorite movie list and edit the user's profile information based on the developed backend system.
